SHOCK

RESUSCITATE

Assess ABCs
Intravenous fluids/
blood products

IDENTIFY
BLEEDING SOURCE

CXR - hemothorax
PXR - pelvic fracture
FAST/DPL - hemoperitoneum
Physical exam - external
bleeding

No bleeding identified

CONSIDER
OTHER CAUSES

Tension pneumothorax
Cardiac tamponade
Blunt cardiac injury
Neurogenic shock

Bleeding source identified

 DAMAGE CONTROL

SBP > 90
Minimize crystalloids
1:1:1 transfusion
Reverse lethal triad
Operative control of bleeding
